

Special mineralization formula:

Calcium	338.80 mg/l	Potassium	2.10 mg/l
Magnesium	55.60 mg/l	Sodium	4.80 mg/l
Sulphate	802.20 mg/l	Chloride	5.70 mg/l
Hydrogen carbonate	318.50 mg/l	Fluoride	1.20 mg/l
pH value	7.24	Total residue	1427 mg/l
Crop-out temperature	9.6°C	Electrical conductivity	1668 µs/cm

Excerpt from the water analysis of the "Nothelferquelle 1" spring by
ARGE UMWELT-HYGIENE GmbH Prof. Dr. I. Jenewein dated May 2, 2012

Mehrner Quelle

The Pure Truth.

The exceptional water from the depths of the Tyrolean Alps.

Mehrner Quelle.
The exceptional water with its unique calcium-magnesium-sulphate-hydrogen-carbonate mineralization.
The Pure Truth. Artesian, since 1267.

For a strong bone structure:

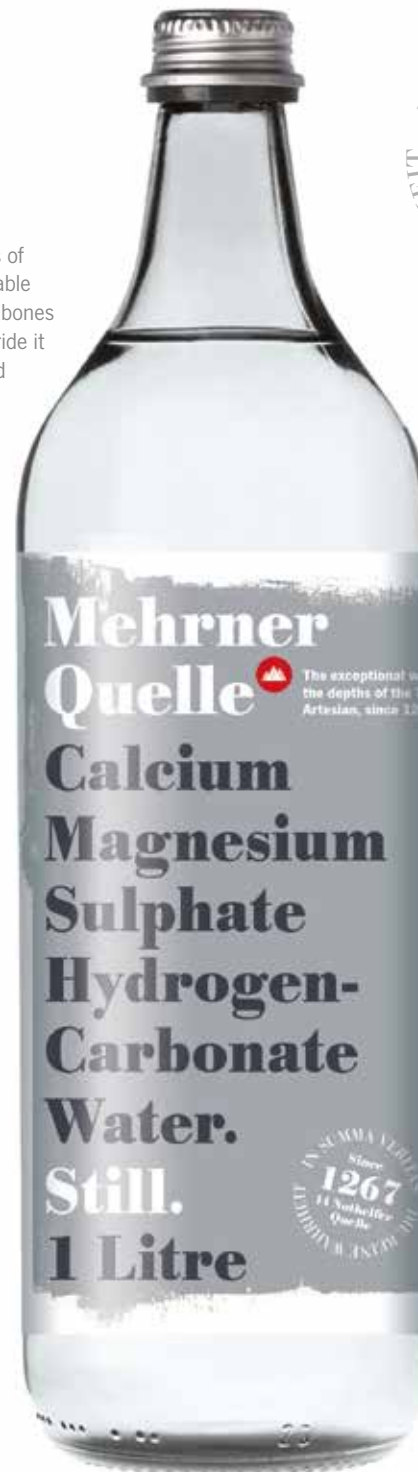

Minerals are essential components of our skeleton. Calcium is indispensable for building up and conserving our bones and teeth. In conjunction with fluoride it strengthens the bone structure and prevents osteoporosis.

Calcium
338.80 mg/l

For an equilibrium in your acid-base balance:

Hydrogen carbonate equilibrates our system. It supports a good acid- base balance and stable pH value of our blood. Mehrner water has the power to neutralize acids.

Hydrogen carbonate
318.50 mg/l

For a healthy heart:

Magnesium is fuel for the heart. A healthy body holds an amount of about 25 mg of it, which must be refuelled and replenished.

Magnesium
55.60 mg/l

For the digestion:

Together with calcium and magnesium, sulphate supports the production of the digestive liquids by the pancreas and supports detoxication of the liver.

Sulphate
802.20 mg/l

The exceptional spring.

The water of Mehrner Quelle lies approximately 102 meters deep under the surface. Once underway it takes more than 30 years until it surfaces from its artesian spring by its own power. The long way through different layers of rock makes it exceptionally rich in valuable minerals and trace elements.

The exceptional origin.

Mehrner Quelle spring water rises from the depths of the Tyrolean Alps. Its outstanding quality makes Mehrner Quelle a delicious, vital and harmonizing water of premium quality.

The exceptional ingredients.

Mehrner Quelle water is characterized by a unique calcium-magnesium-sulphate-hydrogen-carbonate mineralization formula. Its taste is particularly supple.

The exceptional purity.

Mehrner Quelle water is bottled from the spring directly, in its original purity. No preservatives need to be added as it is absolutely germ-free.

The exceptional history.

The water of the Mehrner mineral spring was first mentioned in 1267. Already then it was known as a spring from which clear, rich and tasty water with special ingredients gushes.

An exceptional award.

The Mehrner Quelle spring is entitled to bear the name "Nothelferwasser" (= helper-in-need water). It received this award for a good reason: it has been known and valued for its beneficial quality since long.
